SUBJECT: Updated MS4 Concept Report Summary Template

The MS4 Concept Report Summary Template has been updated to reduce requirements for MS4 documentation during the concept phase. This updated version of the template supersedes all previous editions. The updated template may be used immediately, however the updated template must be used on GDOT projects for which the concept team meeting will occur after January 1, 2022. The template is published on the Manuals & Guides webpage under Roadway, Category: Stormwater Permit (MS4) & Special Design Post-Construction Details at:

<http://www.dot.ga.gov/PartnerSmart/DesignManuals/NPDES/MS4%20Concept%20Report%20Summary.docx>.

If you have questions concerning the MS4 Concept Report Summary Template, please email stormreports@dot.ga.gov. If you have questions about compliance with the MS4 permit or the MS4 Concept Report Summary Template, you may contact Brad McManus at (404) 631 1630.
